DETAILED ACTION

Allowable Subject Matter

Claims 2 – 4 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 2, the cited prior art neither teach nor fairly suggest that the apparatus, as taught by either Sugalski, or Amatucci *et al.* in view of Sugalski, further comprises: a body providing a cylinder for receiving therein components of cell members; a sealing means surrounding the proximal end of the cylinder; a base plate providing a radiation access opening situated adjacent the cylinder proximal end and aligned concentrically therewith and within the circumference of the sealing means; a window member being situated intermediate the base plate and the sealing means and extending peripherally beyond the sealing means; means for removably affixing the base plate to the body and compressing the sealing means against the window to form a hermetic seal therewith; an adjustable means situated at the distal end of the cylinder for applying compressive force urging the combination of cell components toward contact with the window member; and means for hermetically sealing the cylinder distal end.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
